It would seem that working one year in a company is not much. However, during this one year in SouthWestern, I gained a considerable and wide working experience: a three-month internship in administration department, then in liabilities department and again in administration department, this time working independently. SouthWestern gives the opportunity to get to know international environment, to work in young and energetic team in a friendly atmosphere. One of the best advantages is that the company invests in students and graduates and creates opportunity to ambitiously begin their career in Łódź. I've been given this opportunity and I'm not going to waste it.
